

data.frames I

Exercise - Walleye

Answer the following questions by creating an R script and iteratively running the code in RStudio.

1. Load the `WalleyeErie2.csv` file into a `data.frame` object and answer the following questions.
 - a. How many variables are recorded in this `data.frame`?
 - b. How many individuals are recorded in this `data.frame`?
 - c. What is the name and data type for the fifth variable?
 - d. What is the name and data type for the second variable? Does the data type make sense?
-
