

data.frames I - Walleye Exercise

1. Load the `WalleyeErie2.csv` file into a `data.frame` object and answer the following questions.
 - a. How many variables are recorded in this `data.frame`?
 - b. How many individuals are recorded in this `data.frame`?
 - c. What is the name and data type for the fifth variable?
 - d. What is the name and data type for the second variable? Does the data type make sense?
 - e. Demonstrate how to access all of the total length (`tl`) measurements.
 - f. Demonstrate how to see the fifth total length measurement.
 - g. Demonstrate how to see the total length measurements for all fish captured in 2003.
-
